

Vyuhavritti: Rules and Regulations [Online]

Format: ACM ICPC style programming contest.

Ranking Criteria:

1. Number of problems solved.
2. Ties will be broken by total time taken for all problems solved. Time for each problem is measured from the start of the contest to the first accepted solution + 20 mins penalty for each wrong submission. No time is added for unsolved / unattempted problems.
3. Further ties will be broken by the time taken for the last submitted problem [Tentative].

Rules:

1. Please avoid plagiarism, if you are using a standard implementation of an algorithm please credit the source as a comment, providing the direct link. Plagiarism will not be tolerated and may lead to disqualification.
2. Take care while using public compilers, make sure to set your code as "PRIVATE" .
3. Some languages might be disallowed for certain problems.
4. Decisions of organizers regarding disputes will be final, provided a chance of rebuttal and discussion may be given.
5. Please adhere to any other rules of the platform which will be conducting the competition.
6. The time and duration of the contest may be shifted to accommodate for other contests. Due notice will be given if possible.
7. Any further addition to rules and regulations will be communicated.

Top 20 Non-IISc Teams and Top 10 IISc will be invited to the on-campus round. [Tentative]
